Experience

Senior Web Programmer   Aug 2022 — Present
Web Programmer   Feb 2018 — Aug 2022
Ole Elite Software Philippines, Inc.

- Design and implement scalable microservices architecture using tools like docker and kubernetes.
- Lead a team of back-end developers in architecting, developing, and maintaining complex distributed systems using Laravel and ExpressJS framework.
- Collaborate with cross-functional teams including front-end developers, QA engineers and app developers to deliver end-to-end solutions.
- Investigate and resolve critical production issues, applying root cause analysis to prevent recurrence and improve system reliability.

Web Programmer   Feb 2017 — 2018
WAMD Web and Mobile Development Services

- Build and maintain website, back-end and web services.
- Collaborate with designers and app developers to implement best practices and seamless user experiences.

Personal Projects

AI Image Generator Web App

Web app for generating AI images including different styles and models. This app is built in ReactJS and ExpressJS. App includes free generation of text to image and paid generation of image including image to image, controlnet, inpainting and face swap.
Solana NFT Minting Site

NFT minting site built in NextJS. This site showcases the different groups for minting NFT like Whitelisted, OG and Public minters which most of the time have different sets of rules for minting NFTs.
ORE Crypto Miner Manager

Shell script in Ubuntu that will manage and deploy a miner based on the given setup. Script also included a monitoring for a binded wallet for each miner.

Store Inventory API

RESTful API built in NodeJS using ExpressJS. This API is for managing store stocks, inventory, products and order progression.
